Hi Dan,

Great talking with you last week. As we discussed, Chester previously used a modified D net for his upper Animas work. It is basically a D-net coupled with a dolphin bucket:

<http://www.wildco.com/Complete-Bottom-Kick-Net-52in-handle-Nitex-500A-m.html>

<http://www.wildco.com/Dolphin-Bucket-200mL-Polyurethane-SS-504A-m.html>

I have Chester's old nets and I have used them for the ARSG. However, they are not in great shape so I plan to purchase new net materials so that I have replicate nets in good working order.

I look forward to the opportunity to work with you all and I appreciate you passing my contact info along to Tetra Tech. My resume is attached. Please let me know if I can provide you with any additional information.

Thank you,

Citizen Name/Ex. 6
